Teresa Romão

Month 12, 2022

The 'Connectabroad' app is made with the software 'Teta'. The APA is not well documented and therefore some features will remain limited (e.g. agenda). An back-end / database is implemented in the app. However, it should be noted that the capabilities of the app remains in the limits of the tasks in the scenarios.

Catastrophic

N.	Heuristic evaluation	Opinion	Solution
2.	Can't go through months of the calendar. The calendar is static.	Don't agree	In our app it is possible to scroll through the different months.
8.	Allow creating a group with empty parameters	Agree	The app does not check for the validity of the data.
9.	Allow to create an event with empty parameters	Agree	The app does not check for the validity of the data.
10.	Clicking on the event will open the wrong description	Agree, but outside the scope of the task scenarios.	It opens the right description when following the task scenario. However, when freely using the app, it is indeed possible you will see the wrong description, but we consider this outside the scope of the app since it is not asked in the task description.
11.	Clicking on the group will open the wrong description	*see 10.	*see 10.
13.	Submitting the login form with empty parameters makes it possible to enter it.	*see 9.	*see 9.

Major

N.	Heuristic evaluation	Opinion	Solution
3.	Clicking on the background will open the events menu	Agree	Yes, this was indeed a problem. The bug is now fixed.
4.	No "FeedBack" of joining the event	Agree	A pop-up message is included to confirm the action of joining an event
7.	Button "Go to date 14/12/2022" opens "Nazare Surf Competition" event.	*see 10.	*see 10.
14.	When on the register or login page, it is not possible to go directly to the other	Agree	The bug is fixed as you can now cicle between both

	similar page. For example, on the login page, we cannot go to the register page and so on.		pages.
17.	Screen unformatted when opening the app on mobile phones and not on the pc.	Agree, but not fixable	The phone app works on the computer. It seems that this just happens in some cases. It is not clear how we could fix it.
18.	General aesthetic	Agree / not agree	We don't agree on the remark "visual distinction". We have used colour palettes to categorize similar actions. However, we do agree on the remark to "use more visual features". The app mainly contains text and it would be more visualy feasible if images would be included. Images are now included for different groups and events.

Minor

N.	Heuristic evaluation	Opinion	Solution
1.	There isn't a "FeedBack" about which date is selected.	Agree, but unable to fix it	We would have preferred to enlighten the selected date. However, due to the limitations of this software it could not be implemented.
5.	The back button goes to the previous action	Agree	Does what it's supposed to.
12.	Submitting the registration form with empty parameters will roll back the app.	*see 9.	*see 9.
15.	Submitting the login form with empty parameters makes it possible to enter it.	*see 9.	*see 9.
16.	Cannot click on the groups to see their information	Agree	Agree. Description for the groups is now included.
